

## 100% DATA PRIVACY

### Test Data Management Eliminating Data Risk

- ✓ Synthetic data replacement is a more secure form of masking
- ✓ Easy, flexible, and customizable PII/PHI detection
- ✓ Metadata-driven with no access or storage of customer data
- ✓ Fast and scalable multi-threaded performance
- ✓ Ensures full referential integrity across multiple databases
- ✓ Mask full databases, data subsets, or individual files

## Complete Data Privacy Solutions

### In-Place Masking

### Data Subsetting

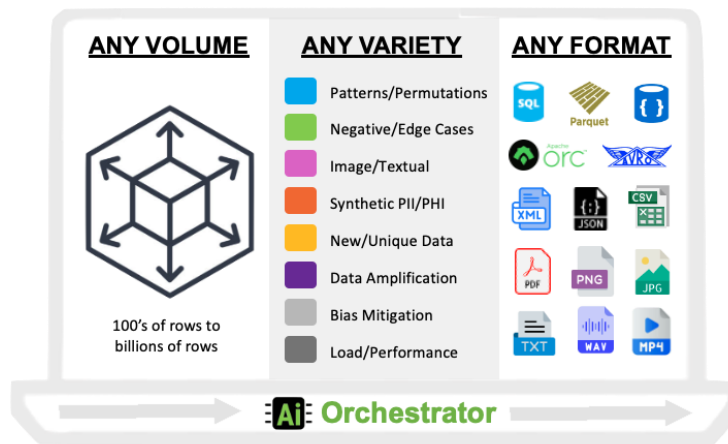

### File Masking

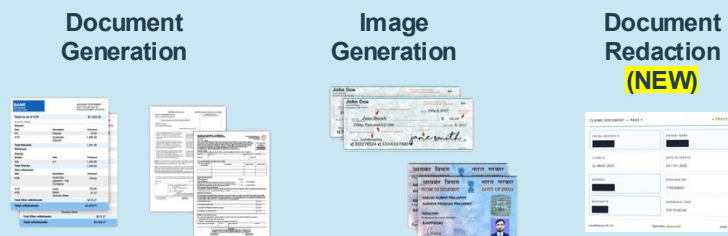

## UNMATCHED DATA QUALITY

### Design-Driven Synthetic Data Generation

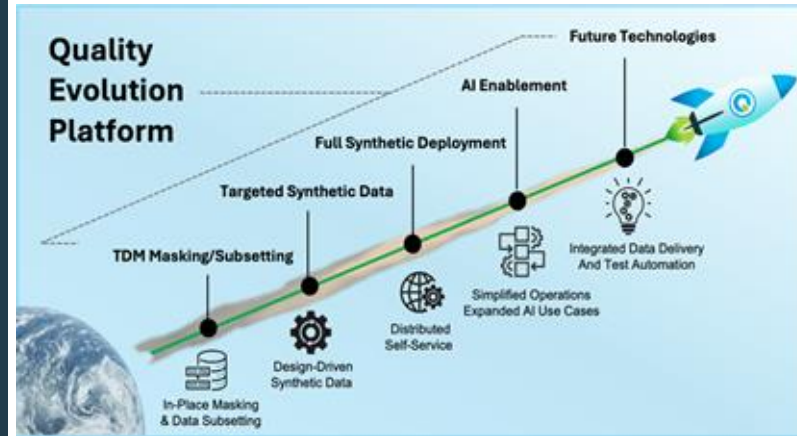

- ✓ Design and generate any volume, variety, or format of data
- ✓ Leverage more than 780+ intelligent data generators
- ✓ Generate data in more than 125 output data formats
- ✓ Maximize test coverage and ensure software quality
- ✓ Accelerate data provisioning for simple or complex test cases
- ✓ Design unbiased training data for ML applications

## Combine With Unstructured Synthetic Data

## ENTERPRISE SCALABILITY

### TDM to Synthetic Data Transformation

## The Enterprise Platform of Choice

- ✓ One platform for all data provisioning
- ✓ Absolute data privacy and compliance
- ✓ Evolutionary path to synthetic data
- ✓ Distributed self-service deployment
- ✓ Centralized lifecycle management
- ✓ US patented referential integrity
- ✓ Supports on-demand test environments
- ✓ Integrate into any DevOps environment
- ✓ Increase test coverage and quality
- ✓ Accelerate testing and release cycles
- ✓ Instant Data for Gen AI - DataConnect (NEW)
- ✓ As Code Synthetic Data Generation (NEW)
